# Gases

## Before You Read

---

### Review Vocabulary

Define the following terms.

*density*

---

*stoichiometry*

---

---

*kinetic-molecular theory*

---

---

### Chapter 10

Balance the following equation.

### Chapter 12

Show the mole ratios for the following reaction.

a. mole ratio of N to H<sub>2</sub>

b. mole ratio of NH<sub>3</sub> to H<sub>2</sub>

### Chapter 13

Explain how gas particles exert pressure.

---

---

# Gases

## Section 14.1 The Gas Laws

### Main Idea

### Details

**Scan** Section 1 of your text. Use the checklist below as a guide.

- Read all section titles.
- Read all boldfaced words.
- Read all tables and graphs.
- Look at all pictures and read the captions.
- Think about what you already know about this subject.

**Write** three facts you discovered about the gas laws.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

### New Vocabulary

Use your text to define each term.

*Boyle's law*

---

---

*Charles's law*

---

---

*Gay-Lussac's law*

---

---

### Academic Vocabulary

Define the following term.

*theory*

---

## Section 14.1 The Gas Laws (continued)

### Main Idea

#### Kinetic Theory

Use with pages 419–420.

#### Boyle's Law

Use with Example Problem 14-1, page 422.

### Details

List the five assumptions the kinetic theory makes about gases.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_
4. \_\_\_\_\_
5. \_\_\_\_\_

**Summarize** Fill in the blanks to help you take notes while you read Example Problem 14-1.

#### Problem

Helium gas in a balloon is compressed from 4.0 L to 2.5 L at constant temperature. The gas's pressure at 4.0 L is 210 kPa. Determine the pressure at 2.5 L.

##### 1. Analyze the Problem

Known:

$$V_1 = \underline{\hspace{2cm}}$$

$$V_2 = \underline{\hspace{2cm}}$$

$$P_1 = \underline{\hspace{2cm}}$$

Unknown:

$$P_2 = \underline{\hspace{2cm}}$$

Use the equation for Boyle's law to solve for  $P_2$ .

##### 2. Solve for the Unknown

Write the equation for Boyle's law: \_\_\_\_\_

To solve for  $P_2$ , divide both sides by  $V_2$ .  $P_2 =$  \_\_\_\_\_

Substitute the known values.  $P_2 =$  \_\_\_\_\_

Solve for  $P_2$ .  $P_2 =$  \_\_\_\_\_

##### 3. Evaluate the Answer

When the volume is \_\_\_\_\_, the pressure is \_\_\_\_\_.

The answer is in \_\_\_\_\_, a unit of pressure.

## Section 14.1 The Gas Laws (continued)

### Main Idea

#### Charles's Law

Use with Example  
Problem 14-2, page 425.

### Details

**Summarize** Fill in the blanks to help you take notes while you read Example Problem 14-2.

#### Problem

A gas sample at 40.0°C occupies a volume of 2.32 L. Assuming the pressure is constant, if the temperature is raised to 75.0°C, what will the volume be?

##### 1. Analyze the Problem

Known:

$$T_1 = \underline{\hspace{2cm}}$$

$$V_1 = \underline{\hspace{2cm}}$$

$$T_2 = \underline{\hspace{2cm}}$$

Unknown:

$$V_2 = \underline{\hspace{2cm}}$$

Use Charles's law and the known values for  $T_1$ ,  $V_1$ , and  $T_2$  to solve for  $V_2$ .

##### 2. Solve for the Unknown

Convert the  $T_1$  and  $T_2$  Celsius temperatures to kelvin:

$$T_1 = 273 + 40.0^\circ\text{C} = \underline{\hspace{1cm}} \text{ K} \quad T_2 = 273 + 75.0^\circ\text{C} = \underline{\hspace{1cm}} \text{ K}$$

Write the equation for Charles's law:

=

To solve for  $V_2$ , multiply both sides by  $T_2$ :

$$V_2 =$$

Substitute known values:

$$V_2 =$$

Solve for  $V_2$ .

$$V_2 = \underline{\hspace{2cm}}$$

##### 3. Evaluate the Answer

When temperature in kelvin increases by a small amount, the volume \_\_\_\_\_ by a small amount. The answer is in \_\_\_\_\_, a unit for volume.

## Section 14.1 The Gas Laws (continued)

### Main Idea

#### Gay-Lussac's Law

Use with Example Problem 14-3, page 426.

### Details

**Solve** Read Example Problem 14-3 in your text.

#### You Try It

##### Problem

The pressure of a gas stored in a refrigerated container is 4.0 atm at 22.0°C. Determine the gas pressure in the tank if the temperature is lowered to 0.0°C.

##### 1. Analyze the Problem

Known:

$$P_1 = 4.0 \text{ atm}$$

$$T_1 = \underline{\hspace{2cm}}$$

$$T_2 = \underline{\hspace{2cm}}$$

Unknown:

$$P_2 = ? \underline{\hspace{2cm}}$$

Use Gay-Lussac's law and the known values for  $T_1$ ,  $V_1$ , and  $T_2$  to solve for  $V_2$ .

##### 2. Solve for the Unknown

Convert the  $T_1$  and  $T_2$  Celsius figures to kelvin.

$$T_1 = \underline{\hspace{1cm}} + 22.0^\circ\text{C} = \underline{\hspace{1cm}} \text{ K}$$

$$T_2 = 273 + \underline{\hspace{1cm}}^\circ\text{C} = \underline{\hspace{1cm}} \text{ K}$$

Write the equation for Gay-Lussac's law.

To solve for  $P_2$ , multiply both sides by  $T_2$ .

$$P_2 =$$

Substitute known values.

$$P_2 =$$

Solve for  $P_2$ .

$$P_2 = 3.7 \text{ atm}$$

##### 3. Evaluate the Answer

The temperature                      and the pressure                     .

# Gases

## Section 14.2 The Combined Gas Law and Avogadro's Principle

**Main Idea**

**Details**

**Skim** Section 2 of your text. Write three questions that come to mind from reading the headings and the illustration captions.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

**New Vocabulary**

Use your text to define each term.

*combined gas law*

---

---

*Avogadro's principle*

---

---

*molar volume*

---

**Academic Vocabulary**

Define the following term.

*convert*

---

## Section 14.2 The Combined Gas Law and Avogadro's Principle (continued)

### Main Idea

#### The Combined Gas Law

Use with page 428.

Use with Example Problem 14-4, page 429.

### Details

Describe the combined gas law.

Write the combined gas law equation.

=

Pressure is inversely proportional to \_\_\_\_\_ and directly proportional to \_\_\_\_\_. Volume also is \_\_\_\_\_ to temperature.

Solve Read Example Problem 14-4 in your text.

#### You Try It

##### Problem

A gas at 100.0 kPa and 30.0°C has an initial volume of 1.00 L. Determine the temperature that could support the gas at 200.0 kPa and a volume of 0.50 L.

##### 1. Analyze the Problem

Known:

$$P_1 = \underline{\hspace{2cm}}$$

$$P_2 = \underline{\hspace{2cm}}$$

$$T_1 = \underline{\hspace{2cm}}$$

$$V_1 = \underline{\hspace{2cm}}$$

$$V_2 = \underline{\hspace{2cm}}$$

Unknown:

$$T_2 = ? \text{ } ^\circ\text{C}$$

Remember that volume increases as temperature increases, and volume is inversely proportional to pressure.

##### 2. Solve for the Unknown

Convert the  $T_1$  Celsius temperature to kelvin.

$$T_1 = \underline{\hspace{1cm}} + 30.0^\circ\text{C} = \underline{\hspace{1cm}} \text{ K}$$

## Section 14.2 The Combined Gas Law and Avogadro's Principle (continued)

## Main Idea

## Details

Write the combined gas law equation.

To solve for  $T_2$ , multiply both sides of the equation by  $T_2$ .

$$\frac{\quad}{T_1} = P_2 V_2$$

Multiply both sides of the equation by  $T_1$ .

$$T_2 P_1 V_1 = \underline{\hspace{2cm}}$$

Divide both sides of the equation by  $P_1 V_1$ .

$$T_2 =$$

Substitute known values.

$$T_2 = \frac{\hspace{2cm}}{100.0 \text{ kPa} \times 1.00 \text{ L}}$$

Solve for  $T_2$ .

$$T_2 = 303\text{K} - 273\text{K} = 30.0^\circ\text{C}$$

**3. Evaluate the Answer**

As pressure \_\_\_\_\_ and volume \_\_\_\_\_ in proportional amounts, the temperature remained constant.

**Avogadro's Principle**

Use with pages 430–431.

**Explain Avogadro's principle by completing the paragraph below.**

Avogadro's principle states that \_\_\_\_\_

The \_\_\_\_\_ volume for a gas is the volume that one mole occupies at \_\_\_\_\_ of pressure and a temperature of \_\_\_\_\_.

# Gases

## Section 14.3 The Ideal Gas Law

### Main Idea

### Details

**Scan** Section 3 of your text. Use the checklist below as a guide.

- Read all section titles.
- Read all boldfaced words.
- Read all tables and graphs.
- Look at all pictures and read the captions.
- Think about what you already know about this subject.

**Write** three facts you discovered about the ideal gas law.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

### New Vocabulary

Use your text to define each term.

*ideal gas constant ( $R$ )*

---

---

*ideal gas law*

---

---

### Academic Vocabulary

Define the following term.

*volume*

---

## Section 14.3 The Ideal Gas Law (continued)

### Main Idea

#### The Ideal Gas Law

Use with pages 434–435.

### Details

**Analyze the ideal gas law.**

The equation is written  $PV = nRT$

$P$  represents \_\_\_\_\_

$V$  represents \_\_\_\_\_

$n$  represents the number of \_\_\_\_\_ of gas present

$R$  represents the \_\_\_\_\_

\_\_\_\_\_ represents temperature

The ideal gas law states that \_\_\_\_\_

\_\_\_\_\_. The value of  $R$  depends on the units used for \_\_\_\_\_.

**Describe the properties of an ideal gas.**

**Describe the properties of a real gas.**

## Section 14.3 The Ideal Gas Law (continued)

### Main Idea

#### The Ideal Gas Law—Using Moles

Use with Example  
Problem 14-7,  
pages 436–437.

### Details

**Summarize** Fill in the blanks to help you take notes while you read Example Problem 14-7.

#### Problem

Calculate the number of moles of a gas contained in a 3.0-L vessel at  $3.00 \times 10^2$  K with a pressure of 1.50 atm.

##### 1. Analyze the Problem

Known:

$$V = \underline{\hspace{2cm}}$$

$$T = \underline{\hspace{2cm}}$$

$$P = \underline{\hspace{2cm}}$$

R =

Unknown:

$$n = ? \text{ mol}$$

Use the known values to find the value of  $n$ .

##### 2. Solve for the Unknown

Write the ideal gas law equation.

$$\underline{\hspace{2cm}}$$

To solve for  $n$ , divide both sides by  $RT$ .

$$n =$$

Substitute known values into the equation.

$$n =$$

Solve for  $n$ .

$$n =$$

$$n = \underline{\hspace{2cm}}$$

##### 3. Evaluate the Answer

The answer agrees with the prediction that the number of moles will be  $\underline{\hspace{2cm}}$  one mole. The unit in the answer is the  $\underline{\hspace{2cm}}$ .

# Gases

## Section 14.4 Gas Stoichiometry

### Main Idea

### Details

**Scan** Section 4 of your text. Use the checklist below as a guide.

- Read all section titles.
- Read all boldfaced words.
- Read all tables and graphs.
- Look at all pictures and read the captions.
- Think about what you already know about this subject.

**Write** three facts you discovered about gas stoichiometry.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

### Academic Vocabulary

Define the following terms.

*react*

\_\_\_\_\_

*involve*

\_\_\_\_\_

*affect*

\_\_\_\_\_

*proportion*

\_\_\_\_\_

## Section 14.4 Gas Stoichiometry (continued)

### Main Idea

#### Calculations Involving Only Volume

Use with page 440.

#### Volume-Volume Problems

Use with Example Problem 14-9, page 441.

### Details

**Indicate** the moles and volume for the reaction below. Use Figure 14-12 as a reference.

\_\_\_ moles      \_\_\_ moles      \_\_\_ moles      \_\_\_ moles

\_\_\_ volume    \_\_\_ volumes    \_\_\_ volumes    \_\_\_ volumes

The coefficients in the balanced equation represent \_\_\_\_\_ amounts and relative \_\_\_\_\_.

**Summarize** Fill in the blanks to help you take notes while you read Example Problem 14-9.

#### Problem

Determine the volume of oxygen gas needed for the complete combustion of 4.00 L of propane gas ( $\text{C}_3\text{H}_8$ ).

##### 1. Analyze the Problem

Known:

Unknown:

V of  $\text{C}_3\text{H}_8$  = \_\_\_\_\_

V of  $\text{O}_2$  = ? L

Use the known volume of 4.00 L to find the volume needed for the combustion.

##### 2. Solve for the Unknown

Write the balanced equation for the combustion of  $\text{C}_3\text{H}_8$ .

\_\_\_\_\_

Write the volume ratio.

Multiply the known volume of propane by the volume ratio to find the volume of  $\text{O}_2$ .

##### 3. Evaluate the Answer

The coefficients of the reactants show that the quantity of \_\_\_\_\_ consumed is greater than the amount of propane. The unit of the answer is the \_\_\_\_\_, a unit of volume.

# Gases Chapter Wrap-Up

After reading the chapter, review what you have learned.  
Match each of the gas laws with its equation.

- |                    |  |
|--------------------|--|
| — Ideal gas law    | 1. $\frac{V_1}{T_1} = \frac{V_2}{T_2}$       |
| — Gay-Lussac's law | 2. $P_1V_1 = P_2V_2$                         |
| — Charles's law    | 3. $\frac{P_1}{T_1} = \frac{P_2}{T_2}$       |
| — Combined gas law | 4. $PV = nRT$                                |
| — Boyle's law      | 5. $\frac{P_1V_1}{T_1} = \frac{P_2V_2}{T_2}$ |

## Review

Use this checklist to help you study.

- Study your Science Notebook for this chapter.
- Study the vocabulary words and scientific definitions.
- Review daily homework assignments.
- Reread the chapter and review the tables, graphs, and illustrations.
- Review the Section Assessment questions at the end of each section.
- Look over the Study Guide at the end of the chapter.

## REAL-WORLD CONNECTION

Explain why the volume of a balloon increases as you blow into it instead of bursting immediately from the added pressure.

---

---

---
